

Commercial Payments Executive Council

Corporate banking leaders focused on payments are experiencing an unprecedented time of growth and change. Our Commercial Payments Executive Council offers a members-only forum, proprietary research, and networking opportunities.

About the Council

The Datas Insights Commercial Payments Executive Council is a free, moderated, knowledge-sharing group for senior bankers whose primary focus is on payments, including heads of corporate banking, strategy, payments, and innovation.

Discussion topics are primarily focused on payment topics like immediate payments, payment automation, and adjacent topics that impact a financial institution's overall payment strategy. Topics are voted on by Council members to ensure high levels of relevance.

Who Can Participate?

Annual membership is open to Datas Insights clients only. It is not a replacement for the Commercial Banking & Payments subscription: It is an enhancement for senior executives on top of an enterprise's current insights and advisory subscription.

Only current bank employees are eligible for membership. The Council is not open to technology providers.

Membership is limited to around 20 financial institutions that represent a cross-section of bank size. The intent is to create a network of like-minded executives that share ideas, challenges, and industry perspectives.

About Membership

Membership in the Commercial Payments Executive Council includes:

- **Quarterly Virtual Meetings**
Each meeting focuses on a set of topics specific to payments, including best practices, market and technology trends, strategic opportunities, and other topics of interest as designated by the members.
- **Data-Based Presentations**
In addition to group discussions, at each meeting Datas Insights will facilitate interactive discussions of research findings primarily drawn from research studies and surveys relevant to payments professionals.
- **In-Person Meeting and Networking Dinner**
An annual in-person meeting of Council members will take place the day before Datas Insights' annual Commercial and Small Business Banking Forum. Council members will receive a complimentary pass to attend the Forum.

We ask that members actively participate in quarterly meetings as well as in Datas Insights research efforts.
