RBR's brand new study of self-service shopping technologies addresses the current lack of data on this dynamic market

A dynamic market for advanced self-service shopping technologies is developing

- ▶ Consumers expect convenient, personalised and speedy shopping experiences
- ▶ To match innovators, retailers need to reduce friction from in-store checkout
- ▶ A diverse range of technologies have been developed to obviate the end-of-shop scanning process, but capabilities and scale of deployment vary dramatically

Technology vendors and other industry stakeholders need intelligence on this market

- ▶ Understand international market context and identify future opportunities
- ▶ Benchmark vs. competitors in key geographic and market segments
- ▶ Provide authoritative, independent substantiation of presence in marketing collateral

Mobile Self-Scanning and Checkout-Free 2023 will provide suppliers with the a comprehensive view of projects around the world

Scope	
Products	Mobile Self-Scanning and Checkout-Free technologies More details on page 4
Geographies	Global data including figures for 23 country markets More details on page 5
Metrics	Number of stores , number of devices ¹
Data	Market size and vendor shares , end-2022 and end-2021
Forecasts	Forecasts for 2023 to 2028, by type of solution and by country
Segmentation	Size of stores: micro (<500 sq ft), small (500-5k sq ft), medium/large (>5k sq ft)
Vendors	80 across checkout-free technology, mobile self-scanning software/hardware , including AiFi, Amazon, BudgetBox, Cloudpick, Datalogic, Extenda Retail, GK and Zebra

¹ For projects with retailer-owned self-scanning devices

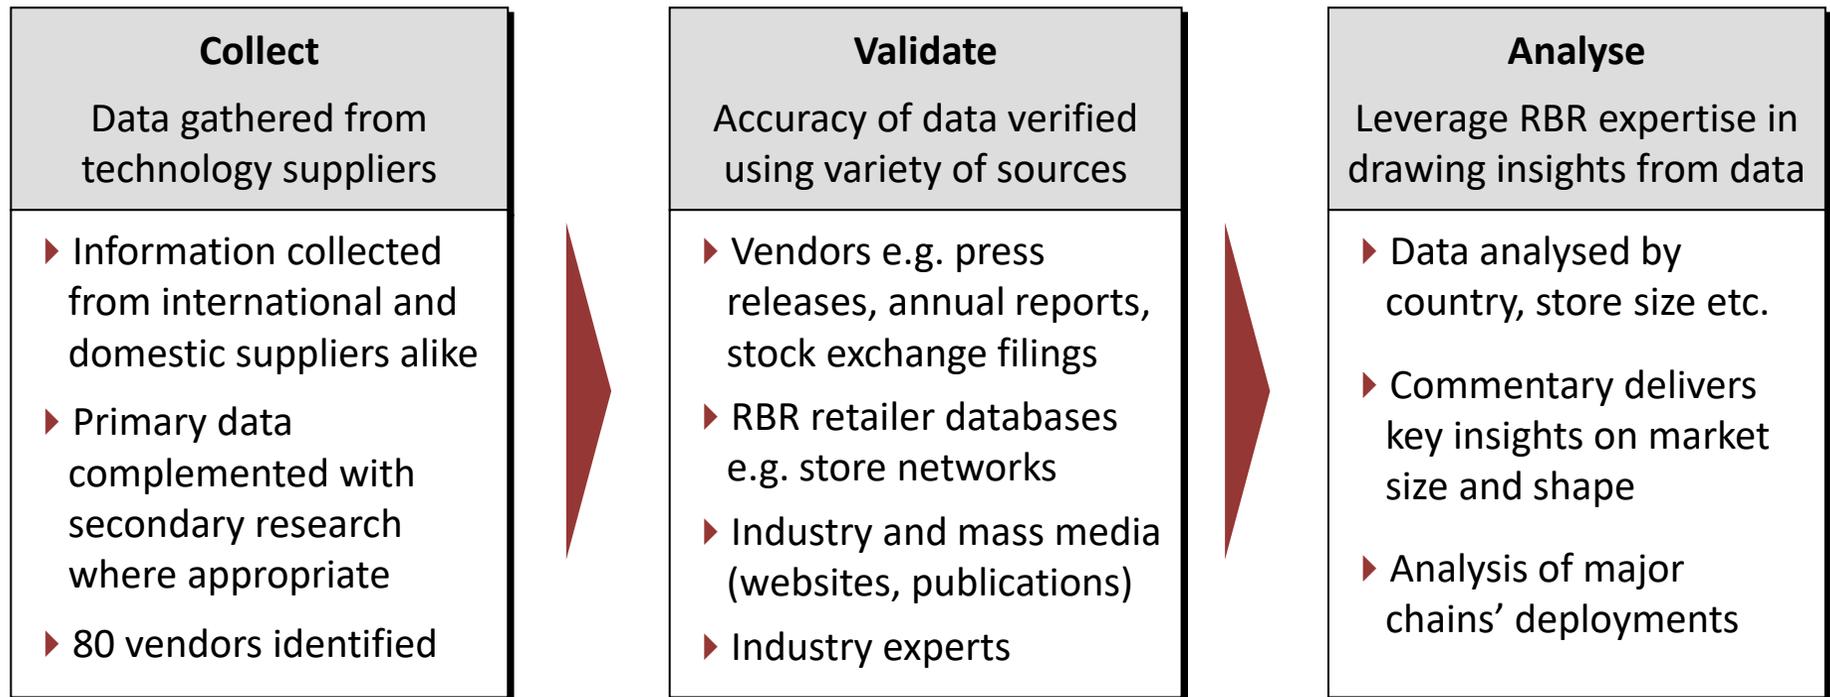

The study addresses technologies that move data capture away from a final “checkout” process

Product Scope		
Dimension	Included	Excluded
Industry	<ul style="list-style-type: none"> ▶ Retail: self-service product selection in a store 	<ul style="list-style-type: none"> ▶ Vending: self-service product selection at a stand-alone machine ▶ Hospitality: self-service or assisted-service ordering; employee fulfilment
Data Capture	<ul style="list-style-type: none"> ▶ Actively – by consumer <ul style="list-style-type: none"> ▪ Mobile self-scanning using retailer- or customer-owned handheld device ▪ Smart cart requiring placement of items within it 	<ul style="list-style-type: none"> ▶ Passively – by technology <ul style="list-style-type: none"> ▪ Using any combination of cameras and other sensors (e.g. weight) ▪ Whether at store or shelf level

The study provides global data, including figures for 23 country markets

The study combines primary and secondary research with RBR's in-house data, market understanding and research expertise

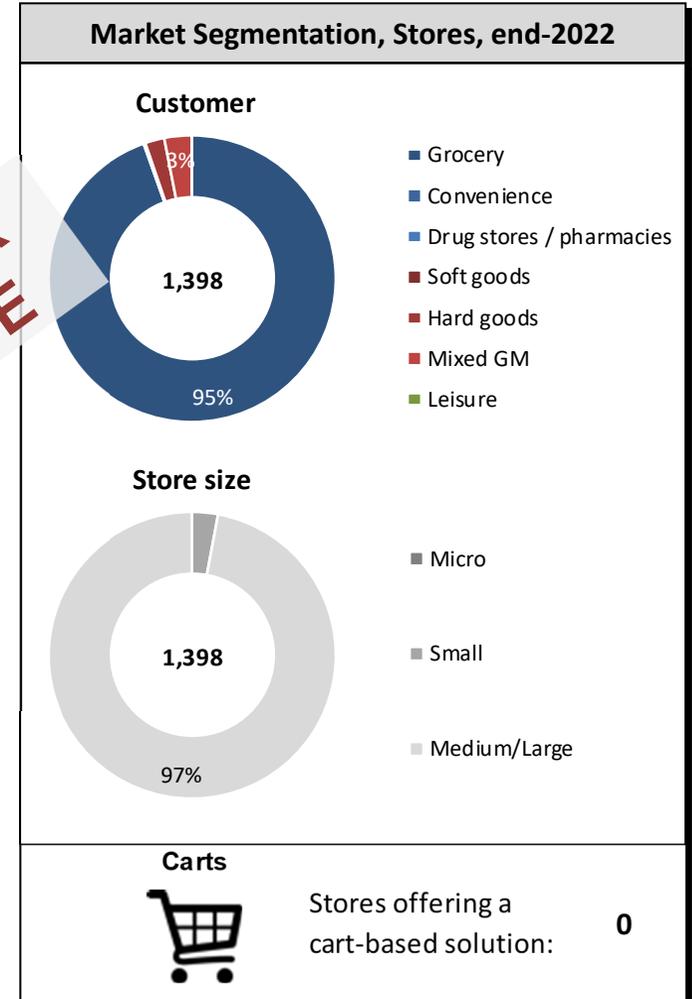

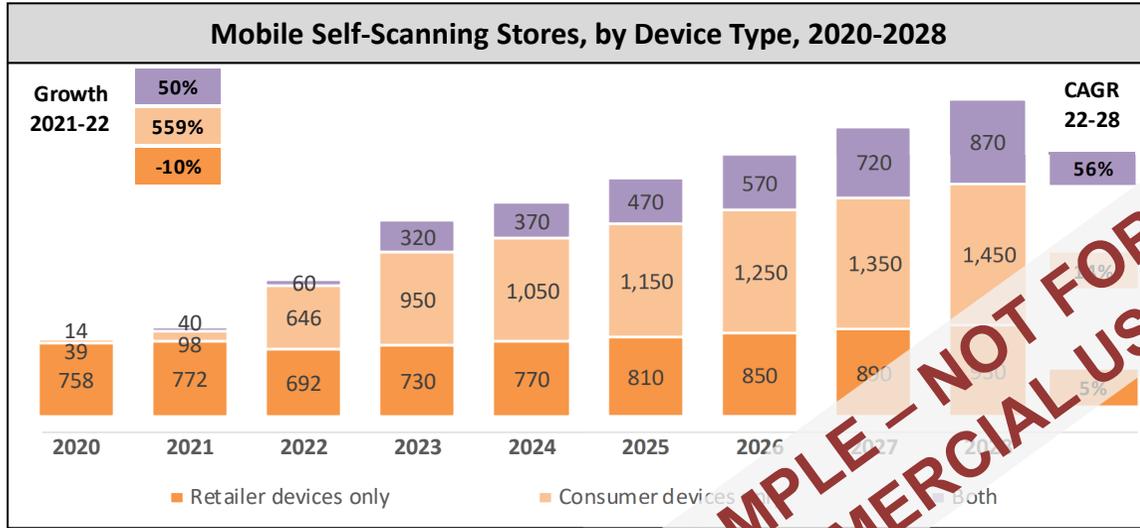

Study clients receive an executive report and a comprehensive market database, plus access to RBR's project team

- ▶ Electronic (multi-user licence) copy of research findings
 - Executive report in PowerPoint containing key market facts and commentary by country
 - Market Database in Excel
- ▶ A conference call presentation of the study results can be organised if desired
- ▶ Privileged access to RBR's senior researchers during and after study
- ▶ The study price is £30,000

While much of the Swedish market is mature, major retailers are rolling out mobile self-scanning smartphone apps in 2023

Key Insights

- ▶ In 2022 the number of stores offering mobile self-scanning in Sweden grew by around 50%
 - This was the result of a large retailer rolling out the service to a significant number of stores via smartphones
- ▶ Many legacy projects involving the largest grocery banners and retailer-provided devices remained largely stable
- ▶ There is potential for growth in the use of self-scanning in micro-sized and small unmanned outlets serving less populated areas of the country
- ▶ By the end of 2028 there are forecast to be around 3,000 stores offering mobile self-scanning
 - Much of this growth will be from stores with retailer-provided devices also offering the service via smartphones, as well as an increase in the number of small, unmanned stores

The Market Database provides comprehensive market and vendor data by country, including store and device numbers

SAMPLE - NOT FOR COMMERCIAL USE

RBR has deep retail industry knowledge, researching a range of store technologies including an annual study of the global self-checkout market

Key Qualifications

- ▶ 30 years' experience delivering international market research to diverse blue-chip client base
- ▶ Expertise in studies of hardware, software and services
- ▶ Carrying out annual study of global market for self-checkout hardware since 2008
- ▶ Strong understanding of general and technology trends in the retail industry
- ▶ Reputation for premium, independent syndicated research studies funded by industry suppliers

Types of Client

Technology suppliers e.g. Diebold Nixdorf, Fiserv, Fujitsu, HP, IBM, Microsoft, NCR, Toshiba, Zebra

Retailers e.g. Auchan, X5 Retail

Payments firms e.g. American Express, Mastercard, PayPal, Visa

Consultancies e.g. Bain & Company, Boston Consulting Group

Investment banks and investors e.g. Advent International, Elliott Management, Goldman Sachs
